SKILLS

Languages: TypeScript, JavaScript, Python, C#, SQL
Frontend: React, Next.js, Tailwind CSS, Figma
Backend: Node.js, FastAPI, PostgreSQL, MongoDB, CosmosDB, Redis
Infrastructure: Docker, Azure, GCP, CI/CD
AI/Agents: LangChain, RAG, LLM Agents, Chroma, Qdrant

CERTIFICATES & DEGREES

Hanoi University of Science and Technology
Engineer in Automation Control.
Specialized in control systems, industrial automation, and embedded systems.

British Council
7.5 in IELTS Academic.

Working experience

JVB Vietnam (2025 - Present)

Full-Stack Engineer

Responsibilities

Full-stack engineer building AI-powered products end to end, while also serving as tech lead and PM for a 4-6 person team from client requirements to production delivery.

- Develop and maintain Next.js web applications with TypeScript, delivering performant and accessible user interfaces.
- Build and deploy FastAPI Python backends, designing RESTful APIs and integrating with LLM pipelines.
- Implement end-to-end AI integration solutions, spanning frontend, backend, and infrastructure.
- Create C# PowerPoint plugins for automated report generation and presentation workflows.
- Manage Azure cloud infrastructure - provisioning resources, configuring CI/CD, and monitoring production deployments.
- Lead a 4-6 person team as PM and tech lead: plan sprints, assign tasks, and track delivery against milestones.
- Serve as client-facing contact: gather requirements, clarify scope, and report progress to stakeholders.
- Set technical direction, review code, and unblock engineers across the team.
- Onboard, mentor, and interview junior and intern engineers; hold technical seminars on emerging technologies.

Sotatek (2022 - 2025)

Frontend Engineer

Responsibilities

Worked on various B2B SaaS platform, scaling the product from early-stage startup with a direct impact on architecture, performance, and developer experience.

- Architected and delivered real-time collaboration features using WebSockets/SSE.
- Reduced page load time through route-based code splitting, lazy hydration, and strategic caching.
- Ensure high-quality codebase with strict code review practices adopted across the team.
- Ensure all compliance with WCAG AA and WCAG AAA standards.
- Collaborate daily with overseas teams through online standups and async communication.
